

Spectral 200 surface grinder for Spectroscopy

SPECTRAL 200 is a table-top portable surface grinder for the preparation of steel and iron samples for spectroscopy. It's compact design with vibration free operation makes it a practical instrument to work with. It incorporates low noise and low dust generation.

The 200mm grinding disc is dynamically balanced for smooth running. Grinding paper is sucked to the grinding disc which does not require any glue. Papers with 40-120 Grit can be used to obtain the desired surface quality. The SPECTRAL 200 is equipped with an electronic brake system bringing the motor to a quick stop in seconds after it has been stopped. A safety switch guarantees automatic switch off when the lid is opened.

Specification

- Table –top surface Grinder for spectroscopy
- 200mm grinding disc
- Vibration-free construction
- Robust steel housing
- 0.55 kW motor
- Standard outlet for exhaust
- Easy to clean
- Electricity requirement: 220-3-50
