

Kemet

Metallographic Consumables & Machines

For over 65 years, Kemet International Limited has been manufacturing Diamond Products in their purpose built laboratories. Over this period, our quality Diamond pastes and suspensions have been the preferred choice for Metallographic Sample Preparation.

Following intensive R&D investigations, we have now put together a complete programme of top quality products covering Cutting, Mounting, Grinding and Polishing **at highly affordable prices**. We offer sample preparation machines for Metallography, Geology, Petrology and Spectroscopy.

Cutting – Aluminium oxide cut off wheels, silicon carbide cut off wheels and diamond cut off wheels.

Mounting – Mounting accessories, cold mounting resins and hot mounting resins.

Grinding – Silicon carbide papers, discs and rolls. Self adhesive and non adhesive.

Conventional Polishing – Alumina powder and suspensions, aluminium oxide powder, silicon carbide powder and colloidal silica suspension.

Diamond Polishing – Monocrystalline and polycrystalline diamond compound, monocrystalline and polycrystalline diamond suspensions and monocrystalline diamond spray. 1/10 Micron to 45 Micron. Manufactured in house to ISO 9001:2000 quality standards.

Polishing cloths – Wide selection of self adhesive chemo-textile cloths, silk type cloths and nap cloths.

Polishing machines – Manual, semi-automatic and automatic cut off and polishing machines. Both single and twin plate.
